Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto—promising a solution to virtually any handling problem.

With a Haynes manual, you can do it yourself...from simple maintenance to basic repairs. Haynes writes every book based on a complete teardown of the motorcycle. We learn the best ways to do a job and that makes it quicker, easier and cheaper for you. Our books have clear instructions and plenty of photographs that show each step. Whether you're a beginner or a pro, you can save big with Haynes! [] Step-by-step procedures [] Easy-to-follow photos [] Complete troubleshooting section [] Valuable short cuts [] Color spark plug diagnosis Complete coverage for your Honda C50, C70 and C90 for 1967 thru 2003: [] Routine Maintenance [] Tune-up procedures [] Engine, clutch and transmission repair [] Cooling system [] Fuel and exhaust [] Emissions control [] Ignition and electrical systems [] Brakes, wheels and tires [] Steering, suspension and final drive [] Frame and bodywork [] Wiring diagrams
