The Agent-Oriented Software
Engineering Workshop, AOSE, focuses on
the synergies and cross fertilization
between software engineering and agent
research. This volume presents both
thoroughly revised selected papers from
the AOSE 2010 workshop held at
AAMAS 2010 in Toronto, Canada in May
2010 as well as invited articles by leading
researchers in the field.

May 10 11 2010 Revised

Agent-Oriented Software Engineering
XI on Apple Books

Agent-Oriented Software Engineering
(AOSE) is a new software engineering
paradigm that arose to apply best practice
in the development of complex Multi-
Agent Systems (MAS) by focusing on the
use of agents, and organizations
(communities) of agents as the main
abstractions. The field of Software Product
Lines (SPL) covers all the software
development lifecycle necessary to develop
a family of products where the derivation
of concrete products is made systematically
and rapidly.

Wikipedia

Abstract Considering the great number of agent-oriented methodologies that can be found in the literature, and the fact that each one defines its own concepts and system structure, one of the main challenges in agent-oriented software engineering (AOSE) research is how to make these methodologies interoperable.

Agent-oriented software engineering |
The Knowledge ...

Agent-oriented techniques represent an exciting new means of analysing, designing and building complex software systems. They have the potential to significantly improve current practice in software engineering and to extend the range of applications that can feasibly be tackled.
