The American Academy of Ophthalmology recommends that adults get a complete eye examination at age 40. This is when early signs of disease or changes in vision may appear. It is important to find eye diseases early. Early treatment can help preserve your vision. Not everyone should wait until age 40 for an eye exam

The Academy's 2015–2016 Basic and Clinical Science Course (BCSC) is ophthalmology's trusted, definitive compilation of scientific research and clinical experience and is continually updated by a faculty of more than 80 experts. Practicing ophthalmologists and residents worldwide use the BCSC to ensure the highest-quality patient care.

Provides the information needed for the diagnosis, management , and referral of common ocular disorders. This edition includes updated images and resources, additional sample problems, and the latest information on such areas as glaucoma care and eye-related aging changes. Historical information is also emphasized in evaluating visual complaints and assessing risk factors for ocular disease.

A patient with strabismus cannot align their eyes. This volume is the most advanced reference for techniques in strabismus surgery.

Keep your ophthalmic knowledge current with the Academy's 2012-2013 Basic and Clinical Science Course (BCSC). The BCSC is the most extensive compilation of ophthalmic scientific research and clinical experience, and it is continually updated by a faculty of more than 80 expert ophthalmologists. Each of the 13 sections includes up-to-date clinical knowledge, concise information and tables, self-assessment questions and answers, photos and illustrations, and opportunities for earning AMA PRA Category 1 Credits. Each BCSC section is available in the print or online format. The BCSC online sections contain the same, complete content as the print version and can be used on nearly any laptop, desktop computer or mobile tablet with an active internet connection. Easy-to-use bookmarks and notes allow for personalized learning, and the search looks through text, images and your notes across all 13 BCSC sections. The BCSC includes: Section 1: Update on General Medicine Section 2: Fundamentals and Principles of Ophthalmology Section 3: Clinical Optics Section 4: Ophthalmic Pathology and Intraocular Tumors Section 5: Neuro-Ophthalmology Section 6: Pediatric Ophthalmology and Strabismus Section 7: Orbit, Eyelids, and Lacrimal System Section 8: External Disease and Cornea Section 9: Intraocular Inflammation and Uveitis Section 10: Glaucoma Section 11: Lens and Cataract Section 12: Retina and Vitreous Section 13: Refractive Surgery Master Index

This concise text is an ideal complement to the medical student curriculum and is an important text for primary care residents and physicians. It features practical information on the diagnosis, management and referral of common ocular disorders and summarizes important ophthalmic concepts, techniques and facts with annotated resources for additional information. This new edition includes updates on neuro-ophthalmology, ocular manifestations of systemic diseases, and drugs and the eye. Additional topics include eye examination, acute and chronic visual loss, the red eye, ocular and orbital injuries, and amblyopia and strabismus.
