This book provides a strong foundation in Quantitative Methods for management students who come from different disciplines. It has been designed according to the latest syllabi of the Bharathiar University and Anna University. The book is prepared with utmost care and rules out the necessity of referring any other book as it is self-contained. This book will surely prove to be a good reference book for both the students and teachers.

This book has been developed with a focus on the need to demystify the subject and make it easy for students to grasp the principles and details involved, and make it easily understandable to beginners exposed to the subject for the first time. An attempt has been made to explain things in a logical progression, in the simplest possible way so that neophytes may quickly grasp the concepts and methodology. A novel approach in the book is the illustrative use of computers with TORA package, as a problem-solving tool. In actual practice, situations arise with large and complex problems that are difficult to solve. At such times, using computers to solve problems gives fast and more accurate results. The chapters are arranged so as to progressively explain the workings of various models in actual practice through step-by-step procedures that so simplify and solve them, that even students from a non-mathematics academic background will grasp them quickly. Linear programming, the most powerful tool for managerial decision-making is covered elaborately, including thorough discussion of various LP methods and LP solutions, Duality in LP problems, sensitivity analysis, etc. Models in the book also use Linear Programming to reach solutions including those relating to transportation and transshipment, assignment, and Game Theory&illustrated with screen-shots of a computer with a TORA package. Readers whether students, business executives, managers, researchers and academicians will find that the insights and knowledge obtained from the book will stand them in good stead in both academic as well as occupational pursuits.

This book examines the fundamentals and technologies of Artificial Intelligence (AI) and describes their tools, challenges, and issues. It also explains relevant theory as well as industrial applications in various domains, such as healthcare, economics, education, product development, agriculture, human resource management, environmental management, and marketing. The book is a boon to students, software developers, teachers, members of boards of studies, and researchers who need a reference resource on artificial intelligence and its applications and is primarily intended for use in courses offered by higher education institutions that strive to equip their graduates with Industry 4.0 skills. FEATURES: Gender disparity in the enterprises involved in the development of AI-based software development as well as solutions to eradicate such gender bias in the AI world A general framework for AI in environmental management, smart farming, e-waste management, and smart energy optimization The potential and application of AI in medical imaging as well as the challenges of AI in precision medicine AI' s role in the diagnosis of various diseases, such as cancer and diabetes The role of machine learning models in product development and statistically monitoring product quality Machine learning to make robust and effective economic policy decisions Machine learning and data mining approaches to provide better video indexing mechanisms resulting in better searchable results ABOUT THE EDITORS: Prof. Dr. P. Kaliraj is Vice Chancellor at Bharathiar University, Coimbatore, India. Prof. Dr. T. Devi is Professor and Head of the Department of Computer Applications, Bharathiar University, Coimbatore, India.

This book provides exactly what students need to complete their chosen route in the new e-Quals IT Practitioner qualifications from City & Guilds at Level 2. It contains the four units needed, providing the depth and breadth of information required to succeed in this qualification. A clear and accessible step-by-step approach ensures that students have a thorough understanding of all the key concepts. Multiple choice revision sections ensure that they are ready for their exams.

This book explores how new media technologies such as e-mails, online forums, blogs and social networking sites have helped shape new forms of public spheres. Offering new readings of J ü rgen Habermas ' s notion of the public sphere, scholars from diverse disciplines interrogate the power and possibilities of new media in creating and disseminating public information; changing human communication at the interpersonal, institutional and societal levels; and affecting our self-fashioning as private and public individuals. Beginning with philosophical approaches to the subject, the book goes on to explore the innovative deployment of new media in areas as diverse as politics, social activism, piracy, sexuality, ethnic identity and education. The book will immensely interest those in media, culture and gender studies, philosophy, political science, sociology and anthropology.
