Success in Corporate Accounting starts here The first Pearson edition of Corporate Accounting in Australia provides comprehensive coverage of the latest company accounting principles, practices and issues in a very accessible manner, while delivering enhanced pedagogy and lecturer support. The aim is to ensure that students don't feel daunted by the technical detail, but at the same time develop an understanding of the core principles that underpin contemporary professional practice. It has been written to help students succeed

in what is traditionally a very demanding subject.

Structure and streamline your teaching. The third edition of this well-known resource aligns and maps to the Financial Services (FNS) Training Package in regard to core unit FNSACC504 Prepare financial reports for corporate entities. Mills prepares students to meet the assessment requirements of the training package, which are based on current accounting standards and the requirement to demonstrate a capacity for independent research. The text takes a concise and logical learning flow, with contents structured to provide clear pathways for teachers and self-paced learners. The improved pedagogy supports learners to develop an understanding of accounting standards, compliance, disclosure and treatment of taxation, and applying that knowledge to prepare financial reports. Help students to embed their learning through practice by value-packing the text with either a printed workbook or an online MS Excel workbook.
