sociolinguistic contributions to linguistic change, distant genetic relationships, areal linguistics, and linguistic prehistory. Examples are taken from a broad range of languages; those from the more familiar English, French, German, and Spanish make the topics more accessible, while those from non-Indo-European languages show the depth and range of the concepts they illustrate. This second edition features expanded explanations and examples as well as updates in light of recent work in linguistics, including a defense of the family tree model, a response to recent claims on lexical diffusion/frequency, and a section on why languages diversify and spread.
