The Franklin Expedition was not alone in suffering early and unexplained deaths. Indeed, both Back (1837) and Ross (1849) suffered early onset of unaccountable 'debility' aboard ship and Ross suffered greater fatalities during his single winter in the Arctic than did Franklin during his first. Both expeditions were forced to retreat because of the rapacious illness that stalked their shape. Frozen In Time makes the case that this illness (starting with the Back expedition) was due to the crews' overwhelming reliance on a new technology, namely tinned foods. This not only exposed the seamen to lead, an insidious poison - as has been demonstrated in Franklin's case by Dr Beattie's research - but it also left them

vulnerable to scurvy, the ancient scourge of seafarers which had been thought to have been largely cured in the early years of the nineteenth century. Fully revised, Frozen in Time will update the research outlined in the original edition, and will introduce independent confirmation of Dr Beattie's lead hypothesis, along with corroboration of his discovery of physical evidence for both scurvy and cannibalism. In addition, the book includes an introduction written by Margaret Atwood, who has long been fascinated by the role of Franklin Expedition in Canada's literary conscience, and has made a pilgrimage to the site of the Franklin Expedition graves on Beechey Island.

In 1845, Sir John Franklin and his men set out to “ penetrate the icy fastness of the

north, and to circumnavigate America. ”  
And then they disappeared. The truth  
about what happened to Franklin ’ s ill-  
fated Arctic expedition was shrouded in  
mystery for more than a century. Then, in  
1984, Owen Beattie and his team  
exhumed two crew members from a burial  
site in the North for forensic evidence, to  
shocking results. But the most startling  
discovery didn ’ t come until 2014, when  
a team commissioned by the Canadian  
government uncovered one of the lost  
ships: Erebus.

**B-17** assigned to the search-and-rescue mission became lost in a blinding storm and also crashed. Miraculously, all nine men on board survived, and the US military launched a daring rescue operation. But after picking up one man, the Grumman Duck amphibious plane flew into a severe storm and vanished. *Frozen in Time* tells the story of these crashes and the fate of the survivors, bringing vividly to life their battle to endure 148 days of the brutal Arctic winter, until an expedition headed by famed Arctic explorer Bernt Balchen brought them to safety. Mitchell Zuckoff takes the reader deep into the most hostile environment on earth, through hurricane-force winds, vicious blizzards, and subzero temperatures. Moving forward to today, he recounts the efforts of the Coast Guard and North South Polar Inc. – led by indefatigable dreamer Lou Sapienza –

who worked for years to solve the mystery of the Duck ' s last flight and recover the remains of its crew. A breathtaking blend of mystery and adventure Mitchell Zuckoff's Frozen in Time: An Epic Story of Survival and a Modern Quest for Lost Heroes of World War II is also a poignant reminder of the sacrifices of our military personnel and a tribute to the everyday heroism of the US Coast Guard.

Earth's past is littered with the mysterious and unexplained: the pyramids, Easter Island, Stonehenge, dinosaurs, and the list goes on and on as science looks for clues to decipher these puzzles. One such mystery surrounds the now-extinct creature called the woolly mammoth. Author and meteorologist Michael Oard has studied the mammoth and its equally mysterious time period, the Ice Age, for many years and has come to some fascinating

conclusions to help lift the fog engulfing the facts. Some of the questions he addresses include: What would cause the summer temperatures of the northern United States and European to plummet more than 50 degrees Fahrenheit? Why did mammoths become extinct across the entire earth at the same time as many other large mammals? Why are the mammoth carcasses found generally in standing positions? How could large lakes exist in what are today very dry, desert-like places? What was the source of the abnormal of moisture necessary for heavy snow? What caused the cold summer temperatures and heavy snowfall to persist for hundreds of years? In logical progression many other Ice Age topics are explained including super Ice Age floods, ice cores, man in the Ice Age, and the number of ice ages. This is one of the most difficult eras in geological history for a

On February 15, 1961, all 18 members of the U.S. World Figure Skating Team were killed in a plane crash, along with 16 coaches, officials, and family members. *Frozen in Time* takes readers inside the lives of the young skaters who died in the crash, revealing their friendships, romances, rivalries, sacrifices, and triumphs. The dramatic focus lingers on two families of powerful women: the Owens and the Westerfelds. Maribel Owen, the most famous woman in figure skating at the time, relentlessly drives her two young daughters--pairs champion Mara and the spectacular Laurence, who graced the cover of *Sports Illustrated* on the day she died. Myra Westerfeld, meanwhile, loses her marriage while guiding her daughters Sherri and Steffi to
