The Stone Age was a prehistoric period during which stone was the main material used for making tools and weapons. The period lasted roughly 3.4 million years, ending between 6000 BCE and 2000 BCE with the arrival of metalworking. "I really enjoyed it when Martin shot the arrows in the sky and when he unwrapped the bear skin.

~~The Stone Age is contemporaneous with the evolution of the genus Homo, with the possible exception of the early Stone Age, when species prior to Homo may have manufactured tools. According to the age and location of the current evidence, the cradle of the genus is the East African Rift System, especially toward the north in Ethiopia , where it is bordered by grasslands .~~
