their narratives are now so universally accepted that few people dare speak truth to the power in the land that feminism has undoubtedly become. However, this book does just that. Opening with a startling revelation in 2014 by Mallory Millett, sister of Kate Millett - a mentally-ill Marxist apologist, and probably the prime mover in the women's liberation movement around 1970 - *Their Angry Creed* is a detailed exposé of what she and her co-conspirators were planning from the start. The author shows how these activists influenced a generation of women - many of whom are now in prominent and powerful positions - to seek a seismic shift in the power balance between women and men by dividing society along the fault line of gender. Feminism has never been about equality for women. It is cultural Marxism, whose principles uphold matriarchy - the social superiority of

At Work - which is to be achieved through the destruction of marriage, the re-engineering of the family, moving women en masse out of the home and into the workforce, and the disruption of society as we know it. Describing how these activists have already secured unreasonable and unfair privilege for women and girls, he points to the demonisation of manhood, men's effective social emasculation, the invasion of men's social spaces to the point of harassment, and the relentless excision of fathers from families. He ends by warning of a coming backlash from men.

Silver Medal from the Independent Publisher Book Awards (Current Events/Social Issues category). Americans are slowly waking up to the dire effects of racial profiling, police brutality, and mass incarceration, especially in disadvantaged neighborhoods and communities of color. The criminal courts are the crucial gateway between police action on the street and the processing of primarily black and Latino defendants into jails and prisons. And yet the courts, often portrayed as sacred, impartial institutions, have remained shrouded in secrecy, with the majority of Americans kept in the dark about how

they function internally. Crook County bursts open the courthouse doors and enters the hallways, courtrooms, judges' chambers, and attorneys' offices to reveal a world of punishment determined by race, not offense. Nicole Gonzalez Van Cleve spent ten years working in and investigating the largest criminal courthouse in the country, Chicago-Cook County, and based on over 1,000 hours of observation, she takes readers inside our so-called halls of justice to witness the types of everyday racial abuses that fester within the courts, often in plain sight. We watch white courtroom professionals classify and deliberate on the fates of mostly black and Latino defendants while racial abuse and due process violations are encouraged and even seen as justified. Judges fall asleep on the bench. Prosecutors hang out like frat boys in the judges' chambers while the fates of

defendants hang in the balance. Public defenders make choices about which defendants they will try to "save" and which they will sacrifice. Sheriff's officers cruelly mock and abuse defendants' family members. Crook County's powerful and at times devastating narratives reveal startling truths about a legal culture steeped in racial abuse. Defendants find themselves thrust into a pernicious legal world where courtroom actors live and breathe racism while simultaneously committing themselves to a colorblind ideal. Gonzalez Van Cleve urges all citizens to take a closer look at the way we do justice in America and to hold our arbiters of justice accountable to the highest standards of equality.

level; make public services work for the people who use them; bring foreign and domestic policy back in line with public opinion; replace the quango state with genuine democracy; and refresh our political system through localism and the use of referendums. The authors, an MP and an MEP, offer an analysis of why people are sick and tired of politicians, and what can be done about it. They set out, in detail, the steps that a new government needs to take to shift powers back from Brussels to Westminster, from Whitehall to town halls, from the state to the citizen.

and the 'liberal' media for alarmism, Moxon's analysis has now been adopted by most of the major political parties. Indeed his views on the dangers of multiculturalism were even echoed by the Chairman of the Commission for Racial Equality, leading the Evening Standard to claim 'Moxon appears not so much a racist as a visionary'. But immigration was never his primary interest, in fact he joined the Home Office in order to study its HR policy, as part of a decade-long investigation of men-women. This book is the result. Notwithstanding its provocative title, *The Woman Racket* is a serious scientific investigation into one of the key myths of our age - that women are oppressed by the 'patriarchal' traditions of Western societies. Drawing on the latest developments in evolutionary psychology, Moxon finds that the opposite is true - men, or at least the majority of low-status

*At Work* males - have always been the victims of deep-rooted prejudice. As the prejudice is biologically derived, it is unconscious and can only be uncovered with the tools of scientific psychology. The book reveals this prejudice in fields as diverse as healthcare, employment, family policy and politics: compared to the long and bloody struggle for universal male suffrage, women were given the vote 'in an historical blink of the eye'.

Parental activism movements are strengthening around the world and often spark tense personal and political debate. interactions between the politics, everyday life, and social activism of mothers and fathers. From fathers' rights movements to natural childbirth to vaccination debates, these essays provide new insight into the identities and strategies applied by these movements as they confront local ideals of gender and family with global ideologies.

Since the introduction of the so called "No Fault Divorce" in Canada, the divorce industry has evidenced unprecedented growth estimated at \$6 billion per year. The problem is that the Legal / Court industry thrives off the \$B's generated by Tax payers and Families in crises. For this they provide no value and in fact cause destruction of families by unnecessarily removing fathers from children's lives and lowering the standard of living for all family members. This is done through unnecessary litigation, biased decisions

and unreasonable support orders which escalate conflict to perpetuate the status quo in support of their self serving business. The Solution is to update divorce laws to reflect parental equality and get families out of court eliminating significant grief and \$'s wasted by families and taxpayers. An alternative to courts is identified in the book.

The Family Court was a progressive reform of the 1970s. Now it is perhaps the most hated institution in Australia. In 'Kangaroo Court', John Hirst investigates what went wrong. This is a measured yet unsparing appraisal which interleaves individual cases with compelling legal and moral argument. Hirst takes us deep into the workings of the Court and the domestic apocalypses it sees every day. He explores the Court's fervour to uphold the best interests of the child no matter

At Work what and traces its chilling consequence: a court where malicious allegations regularly go unpunished. He notes the Court's enormous power over individual lives, as well as its self-proclaimed status as a 'caring court', and wonders at its ability to overlook the defiance of its own authority. In closing, he considers how to reform an institution that has bred antagonism and extremism and too often entrenched paranoia and despair. Lucid and urgent, 'Kangaroo Court' is a cautionary tale about the perils of high-mindedness when it comes to dealing with the breakdown of families. 'When Family Court judges talk piously of the 'caring court', I wish they could hear the roar of pain that their piety has caused.' —John Hirst, 'Kangaroo Court' 'An Emile Zola-style pamphlet of accusation against our family law system which shatters the court's last remaining intellectual
