Simultaneous engineering is part of the time-based management approach. It is a project management approach that helps firms develop and launch new products more quickly. All of the areas involved in a project are planned together. Everything is considered simultaneously (together, in parallel) rather than separately (in series).

Wiley: Simultaneous Engineering for New Product ...

Simultaneous Engineering/Concurrent Engineering Product and service development consists of the movement of a product or service idea from concept through to market availability. This process involves a number of distinct phases and has traditionally been viewed as a linear process involving individual, predetermined steps, each of which required completion before subsequent stages could begin.

Simultaneous Engineering/Concurrent Engineering

Concurrent engineering (CE) is a work methodology emphasizing the parallelization of tasks (i.e. performing tasks concurrently), which is sometimes called simultaneous engineering or integrated product development (IPD) using an integrated product team approach. It refers to an approach used in product development in which functions of design engineering, manufacturing engineering, and other ...
