This thoroughly revised, updated and enlarged edition of a popular textbook helps undergraduate medical students prepare for their qualifying examinations.It is written and presented in a lucid manner for readily grasping the problems of surgery - the problems which they have to tackle in their examinations as well as in the wider world outside the examination halls, i.e.in clinical practice. Many new clinical pictures related to individual lesions/diseases have been included in this edition for better visual impression and understanding.It is really gratifying for the author to find it running through many editions, which clearly indicates that the book has proved to be fully satisfying the needs of the students in the institution of medical learning.

This text is designed to take the MRCS candidate through the clinical examination. It offers information on how the clinical exam is organized, the marking scheme and how to prepare for the exam. The chapters go through the exam bay-by-bay, including details regarding set-up in the bay, commonly asked-for examinations and cases that are accompanied by photographs where appropriate. There is a chapter on communication and tear-out summary cards are featured for each chapter to aid revision.

Physical Examination of Surgical Short Cases is the initial clinical assessment on surgical patients, consisting of a set of clinical tests performed over five to 10 minutes in order to come to a diagnosis. This book emphasises on proper techniques of examination and sequence of examination steps. The descriptions of techniques are simplified, to be more of "how to do it", and steps of examination are in point form, so that it is easily read, remembered and practised. Topics included cover all common diseases in surgical outpatient clinic and inpatients. The content of this book had been discussed extensively and received a consensus among lecturers cum surgeons, to ensure its credibility and to confirm standardisation of teaching. We hope that this book will help undergraduates to acquire strong foundation on physical examination of surgical cases.
