

CABLE TV BILL HIGHLIGHTS

Limited basic delivers the simplest level of cable service with local channels and a handful of others. It is the only tier of service still regulated by the FCC.

Expanded upgrade broadens the channel selection from limited basic with staples such as CNN, MTV, TLC and A&E for a total of 71 channels. Expanded channels are available as a package only with limited service.

Premium and pay-per-view channels cost \$3.95 and up. HBO, Cinemas, Starz!, Showtime and The Move Channel are all available separately at \$10.95 each. A slight discount is available by subscribing to more than one premium movie channel.

Digital service transmits some programming with a sharper, clearer-sounding signal rather than with typical analog signals. Customers also get a variety of music-only channels and a wider range of premium channel and pay-per-view options.

Converter box and remote control rental is needed only by Cox customers who wish to subscribe to premium channels, pay-per-view movies, or digital service. Full Channel customers are required to rent these devices for all levels of service.

Bundle discount offers a discount of \$10 a month to customers who subscribe to cable, telephone and Internet services.
