Subject: Present Statute:

Joe, and Paul, I spoke with John Celona about sponsoring these changes to allow for electronic prescribing. He was agreeable. Could one of you take him the actual language and get it drafted into a bill form. The Department of Health has signed off on this and supports it. The Medical Society is on board also. I have not run it past Matty Lopes or PhRMA, the Nurse Practitioners or the Clinical Psychologist. Nurse Practitioners and Clinical Psychologist are allowed to prescribe in RI. I believe Clark Curtis represent the Clinical Psychologist, but I don't know who represents the Nurse Practitioners.. Please let me know if you need anything else. Thanks, Carlos.
