Giovanni Cicione
Chairman of the Rhode Island
Republican Party

Dear Mr. Cicione,

Endurance, tolerance and courage must be part of our daily life, there are others virtues to be considered to fulfill some of our daily task and responsibilities to our family, our neighbors and our community but when those duties are to be accomplish through a political machinery with an uneven and inequality system fill with peoples locking the basic understanding of human values, seduced by power, money and an illusion of glory and fame than those duties are to be attended through others venues.

It's with sorrow that I' am morally obligated to resign my position as the Chairman of the RI Republican Hispanic Assembly, my post as a member of the Republican Central Committee and my City registration to this party.

I would also like to point out that during my tenure of my position I came to realized that I was underutilized and marginalized by the same peoples that we help reached public office through our support, commitment and hard work.

I do hope that my resignation served as a sign, that the Republican Party in this Nation need to reevaluate their position in a Society that it strength and sovereignty depend on the unification of our peoples and not the division that we had build and that we should concentrate our efforts on our similarity and not on our differences.

That we out to follow the lesson that our Armed Forces has learned while defending our Freedom, our Democracy and our way of life through forces made out of an array of soldiers from every corner of the world who like any American swore to defend our Nation with the same commitment as our fore father before them.

We must prepared our peoples to adjust and adapt to our current time, that our survivorship will be in the hands of the very same peoples whom at one time or another we found it hard to deal with it because of Color, Religion, Race, Ethnic or National Origin; for our children will be a witness to this.

Ivan G. Marte
